

# TORONTO COMMUNITY HEP C PROGRAM

## REFERRAL FORM

09/22

The TCHCP is an innovative, community based, client-centered collaborative care model which provides HCV support, education, and treatment to individuals living with, or at risk of acquiring Hepatitis C infection. We work with people who have had difficulty accessing the mainstream health care system. TCHCP clients are often very low income or homeless and have current or past substance use. We practice within a harm reduction framework and use a facilitated peer support model.

The TCHCP has 4 partner sites: South Riverdale CHC, Regent Park CHC, Sherbourne Health Centre and Parkdale Queen West CHC. We accept referrals from individual providers and community agencies as well as from clients themselves.

If you are interested in referring someone to TCHCP, please fill out the information below and send it to any of the 4 sites to start the intake process.

Referral Source (please check one): Agency ☐ Health Care Provider ☐ Individual (self-referral) ☐
