M = Mandatory (all cells must be cor	mpleted) P = Priority (complete ONLY the co	mments cell if y	ou are not wo	rking on this indica	ator) A= Addition	nal (do not se	elect if you are not working on this ir	ndicator) C = Custom (add	any other indicators you are working or	n)			
Theme I: Timely and	Efficient													
Efficient Transitions	Timely	Percentage of screen eligible A female patients aged 23 to 69 years who had a Pap test within the previous three years.	% / PC organization population eligible for screening	EMR/Chart Review / Most recent 3 year period		80.30%	82%	Timely access to cancer screening leads to early identification of precancerous and cancer cells which leads to early treatment and better health outcomes.		1) Monitor results monthly 2) Collect socio-demographic data to facilitate stratification of cancer screening rates. 3) Explore targeted approaches to reach clients who have declined or not followed through with screening.	1) Continue to produce quarterly reports to identify clients due for screening 2) Follow up wit clients due for screening to offer/book PAP appointments. 3) Produce bi-annual reports to identify clients who have declined or not followed through with screening, stratified by racial/ethnic group and by income. 4) Develop targeted approaches to educate clients who have declined or not followed through with screening. Targeted approaches will have a health equity focus with the goal of increasing screening rates in client populations with the lowest screening rates.	Percentage of screen eligible clinical clients who have been offered a Pap test in the previous three years.	Target by March 31, 2023 is to offer cancer screening to 82%	
		Percentage of screen eligible A female patients aged 52 to 69 years who had a mammogram within the past two years.	% / PC organization population eligible for screening	EMR/Chart Review / Most recent 3 year period		71%	73%	Timely access to cancer screening leads to early identification of precancerous and cancer cells which leads to early treatment and better health outcomes.		1) Monitor results monthly 2) Collect socio-demographic data to facilitate stratification of cancer screening rates. 3) Explore targeted approaches to reach clients who have declined or not followed through with screening.	Produce bi-annual reports to identify clients who have declined or not followed through with screening, stratified by racial/ethnic group and by income. 4)Develop targeted approaches to educate clients who have declined or not followed.	Percentage of screen eligible clinical clients who have been offered a mammogram in the previous two years.	Target by March 31, 2023 is to offer cancer screening to 73%	
		Percentage of screen eligible patients aged 52 to 74 years who had a FOBT/FIT within the past two years, other investigations (i.e., flexible sigmoidoscopy) or colonoscopy within the past 10 years.	% / PC organization population eligible for screening	EMR/Chart Review / Most recent 3 year period		71.00%	72%	Timely access to cancer screening leads to early identification of precancerous and cancer cells which leads to early treatment and better health outcomes.		1) Monitor results monthly 2) Collect socio- economics/demographic data to facilitate stratification of cancer screening rates. 3) Explore targeted approaches to reach clients who have declined or not followed through with screening.	1) Continue to produce quarterly reports to identify clients due for screening 2) Look at strategies to engage RNs and clinical assistants in educating and booking clients for FITs. 3) Produce bi-annual reports to identify clients who have declined or not followed through with screening, stratified by racial/ethnic group and by income. 4) Continue to involve clinical providers in targeted approaches to educate clients who have declined or not followed through with screening. Targeted approaches will have a health equity focus with the goal of increasing screening rates in client populations with the lowest screening rates.	Percentage of screen eligible clinical clients who have been offered a FOBT/FIT within the past two years, other investigations (i.e., flexible sigmoidoscopy) or colonoscopy within the past 10 years	Target by March 31, 2023 is to offer cancer screening to 80% of eligible clinical clients.	
		Percentage of clients who report C that the last time they were sick or had a health problem, they got an appointment on the date they wanted.	% / PC organization population (surveyed sample)	In-house survey / January - December 2021	91407*	89.00%	89%	Timely access to a client's primary care provider leads to better health outcomes as it facilitates continuity of care and early intervention strategies hence lessening reliance on costly hospital and specialist visits.	1	Monitor results and compare with peers. Share Client Experience Survey results with staff, board and community	Client experience surveys administered regularly. Results shared with staff annually or more often if needed.	Percentage of clients completing Client Experience Survey who responded "yes" to the question about their ability to get an appointment on the date they wanted it.	Will collect client experience surveys for the equivalent of 5% of clients accessing clinical services	
Theme II: Service Excellence	Patient- centred	Percent of patients who stated that when they see the doctor or nurse practitioner, they or someone else in the office (always/often) involve them as much as they want to be in decisions about their care and treatment	% / PC organization population (surveyed sample)	In-house survey / January - December 2021	91407*	84.00%	84%	Patient involvement in their health care improves health outcomes by helping ensure appropriate and timely services are accessed and patients are involved in monitoring their own care.		Monitor results and compare with peers. Share Client Experience Survey results with staff, board and community	Client experience surveys administered regularly. Results shared with staff, board and community.	Percentage of clients completing Client Experience Survey who responded "often" or "always" to survey question about involvement in decisions about their care.	Will collect client experience surveys for the equivalent of 5% of clients accessing clinical services	
		Percentage of clients who report C feeling comfortable and welcome at the CHC	% / PC organization population (surveyed sample)	In-house survey / January - December 2021	91407*	98.00%	98%	Clients who feel welcome and comfortable at the CHC are more likely to access services in a timely manner which leads to better health outcomes.		Monitor results and compare with peers. Share Client Experience Survey results with staff, board and community	Client experience surveys administered regularly. Results shared with staff, board and community.	Percentage of clients completing Client Experience Survey who responded "yes" to the question asking if they feel welcome and comfortable at the CHC.	Will collect client experience surveys for the equivalent of 5% of clients accessing clinical services
